

Let's Make Your Technology Work for You

M2VA Services, LLC

M2VA Services, LLC is a certified SBA 8(a), Woman-Owned Small Business (WOSB) consulting firm specializing in government, education, and nonprofit organizations, with significant industry experience gathering technical and business requirements, creating a sustainable, scalable data architecture, specializing in low-code or no-code IT solutions that facilitate widespread adoption from end users of all environments and backgrounds, and training teams of all sizes and modalities in such solutions, including cloud computing, IoT, and Power Platforms.

Prior Performance:

Microsoft Power Platform:

- Created 5 SharePoint lists for federal client, fed to programmatic Power BI dashboard in real time for specific and adaptable reporting needs.
- Updated private sector client's SharePoint with custom hex codes to follow marketing and 508 best practices using PowerShell scripting solution.
- Created custom PowerApp solution for federal client with personalized branding following Office's best practices, showing and updating real-time data from SharePoint and PowerBI.
- Built customized SharePoint Intranet for federal client, following branding best practices, custom permissioning, provided interaction and templated steps, and completed documentation and training during the handover process.

Google:

- Successfully managed Google to Microsoft migration for small private client, including all documentation, reporting, and training capabilities within new Microsoft environment.

Ad Hoc Projects:

- SharePoint intranet redesigns and builds.
- DAX, PowerShell, and SQL coding.
- Ad hoc curriculum development and training deliverables (live, recorded, virtual, in-person).

NAICS Codes:

Case Studies

Strativia LLC: Federal Power BI Dashboards

The directors of the government client were looking to tell stories of their small team's success via data dashboards in the Microsoft platform. When the project started, various metrics were stored in Excel sheets and in emailed PDFs between multiple stakeholders. In the course of six months, we were able to migrate the information to Microsoft Lists, and we worked together to ensure the team felt comfortable with the new data processes. We set up Power BI dashboards and reports, normalizing and standardizing the data, creating custom measures and date tables, integrated a countdown clock on key deliverables, and utilized Microsoft Power Automate to check and ensure all teams were meeting their deadlines. Throughout the process, we helped train key personnel and create SMEs in data governance, Power BI, and Microsoft Flow.

BCS, Inc: Federal SharePoint Design and Training

A small government office had multiple SharePoint sites with disparate looks, murky data processes, and no real ownership of data. As a subcontractor to BCS, Inc, M2VA Services helped them by providing a sitewide audit and site map that showed the different linkages between their sites and others, and helped determine the updated look and feel, completed site templates, created basic data maintenance processes, and completed user training over multiple weeks so they could continue to take ownership over their site pages and data.

Background

About Megan Miller, CEO and Founder

- I started in healthcare consulting, then moved to **management consulting**. I rejoined the private sector and graduated to an IT Project Manager, getting my **PMP** and **CSM** certifications in 2019. I created M2VA Services, LLC in 2021 after working as an independent contractor to provide services based on **quality** and **customer service**.
- As a **certified teacher**, user experience is very important. Our values include using what clients already have, educating their users, and **simplifying processes**.
